

NFTY TREE

World's best NFT gaming platform at:
nftytreetree.io

Presented by: Alex, Alisha, Tas

What is NFTY TREE?

Invest \$1M & discover the world's best
NFT gaming trading platform

We are building out an innovative platform that hosts crypto
bids for the one of the most popular type of NFT'S: games!

We will be presenting evidence to support the value of the investment to an investor
who is unfamiliar with the blockchain world.

We will be discussing...

1. What is a NFT, and why would anyone invest in them?

2. Are Gaming NFTs specifically a good investment?

3. How do gaming NFTs generate profit and how much can they make?

4. Why are gaming NFTs becoming so popular?

1. What is an NFT?

Non-Fungible Token (NFT):

A unit of data stored on a digital ledger, called a blockchain, that certifies a digital asset to be unique and therefore not interchangeable.

30 Day Sales (USD) of NFTs by category, Ending 12th April, 2021

2. Why Gaming NFTs?

β of Gaming Portfolio: 11

3. Potential for Revenue \$AXS

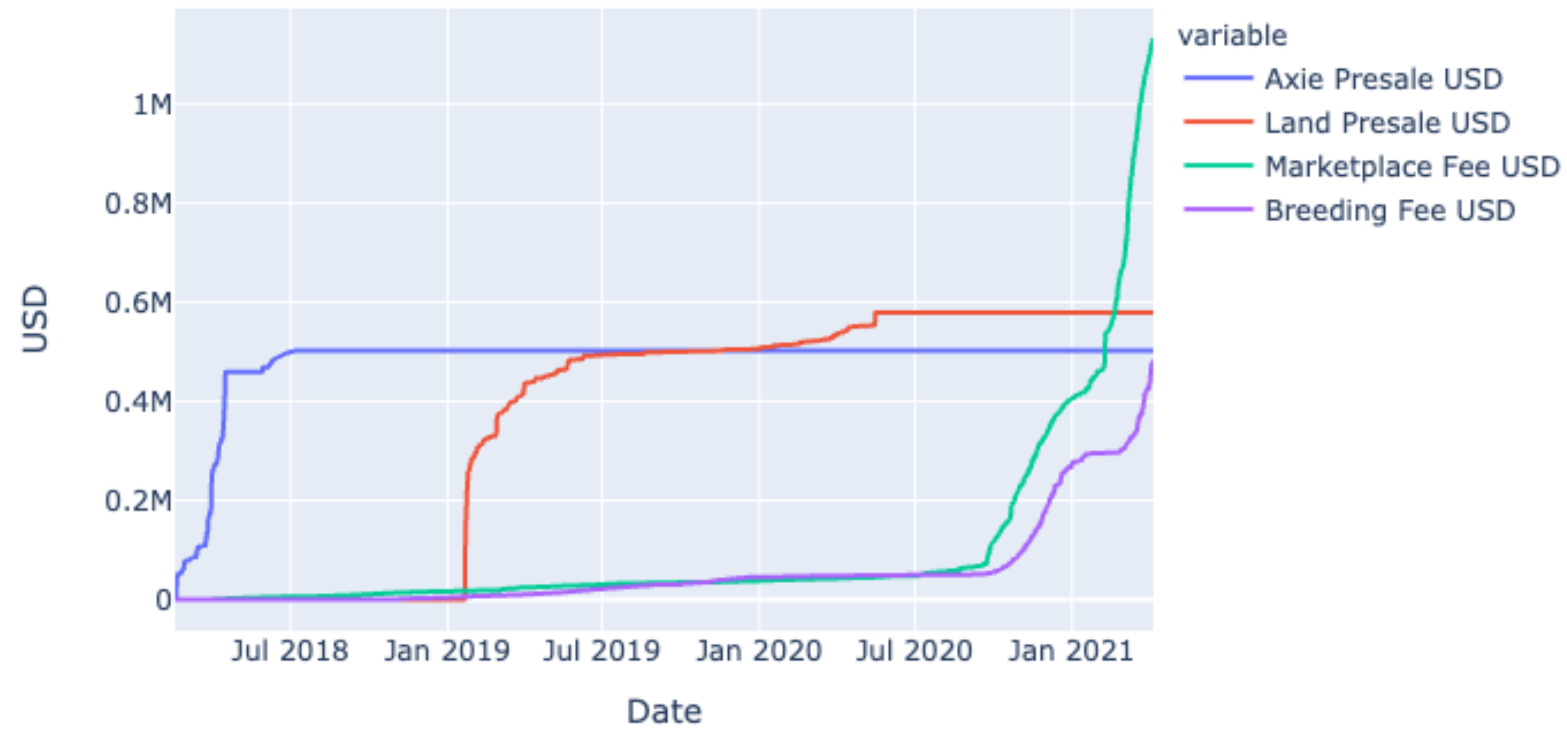

Can NFT gaming platforms be profitable?

3. How much revenue can an NFT game generate and through what methods/avenues?

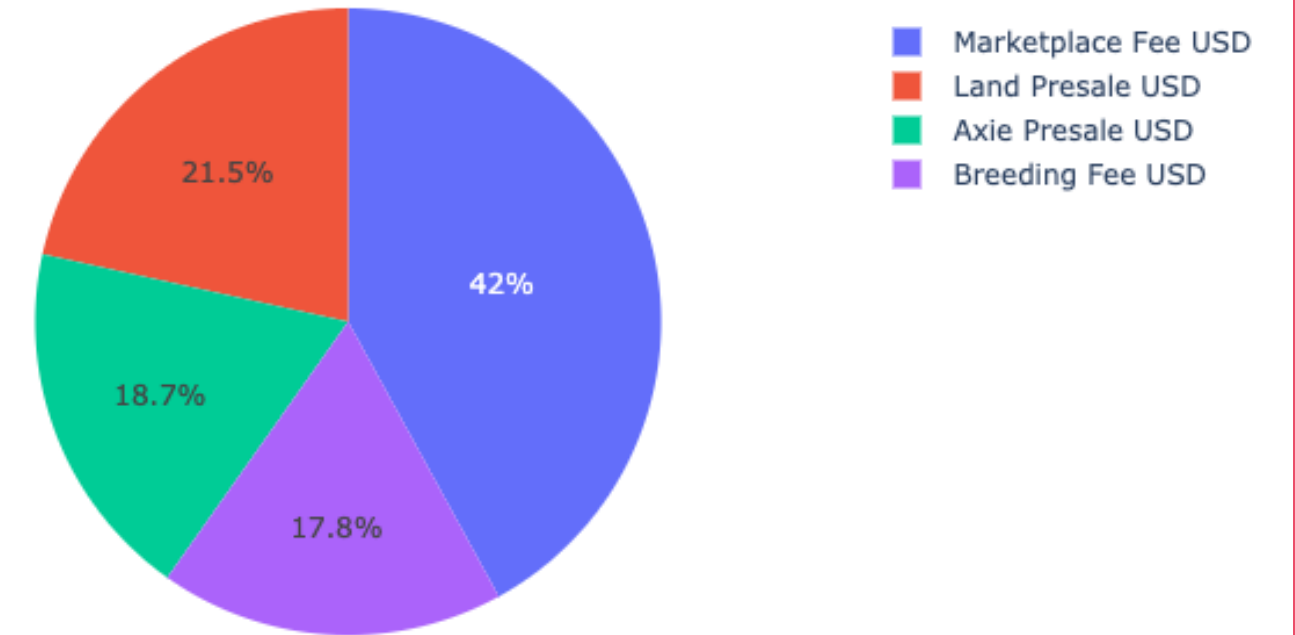

- We explored the most popular NFT game: "Axie Infinity" where players can participate in:
 - Sales of Axies & Land \$
 - Breeding (accrues fees) \$\$
 - P2P Trading (USD1.2m last 7 days according to nonfungible.com) \$\$\$
 - Battles (Earn Crypto) \$
- \$AXS token (1000% in 160 days)

3. Potential for Revenue

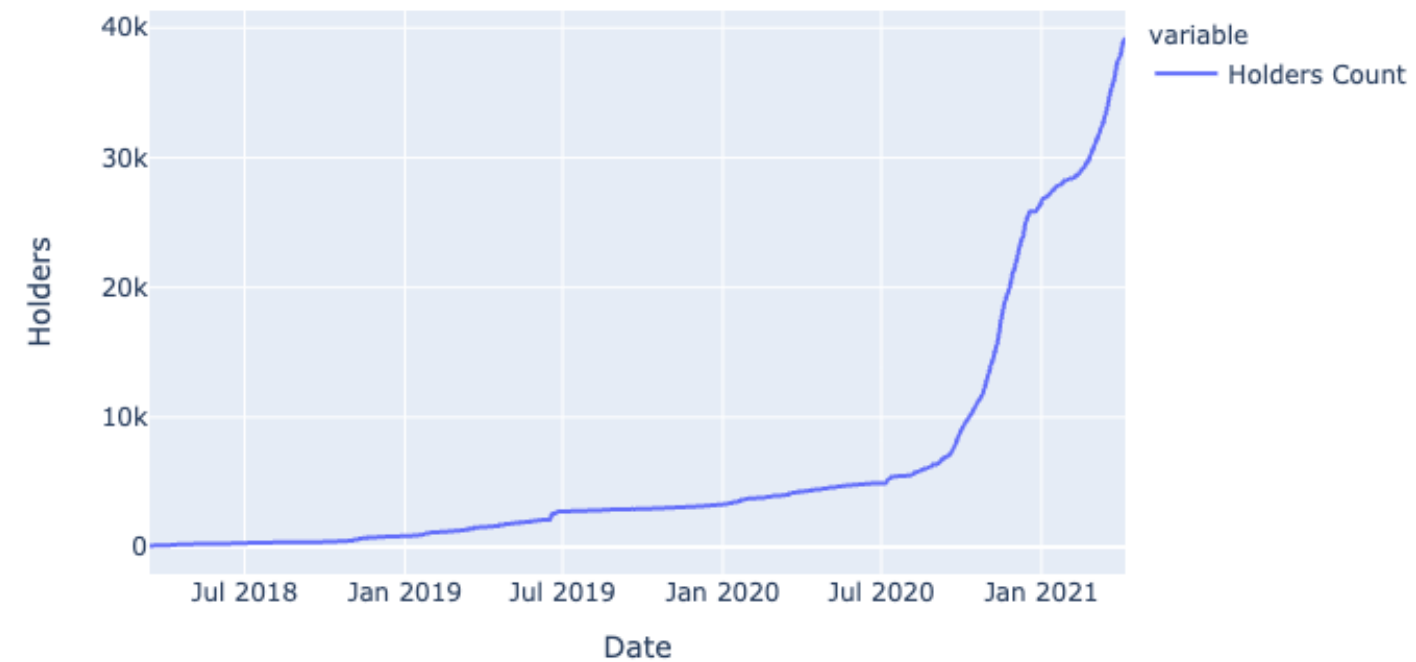

Revenue vs Time

Revenue Composition (to date)

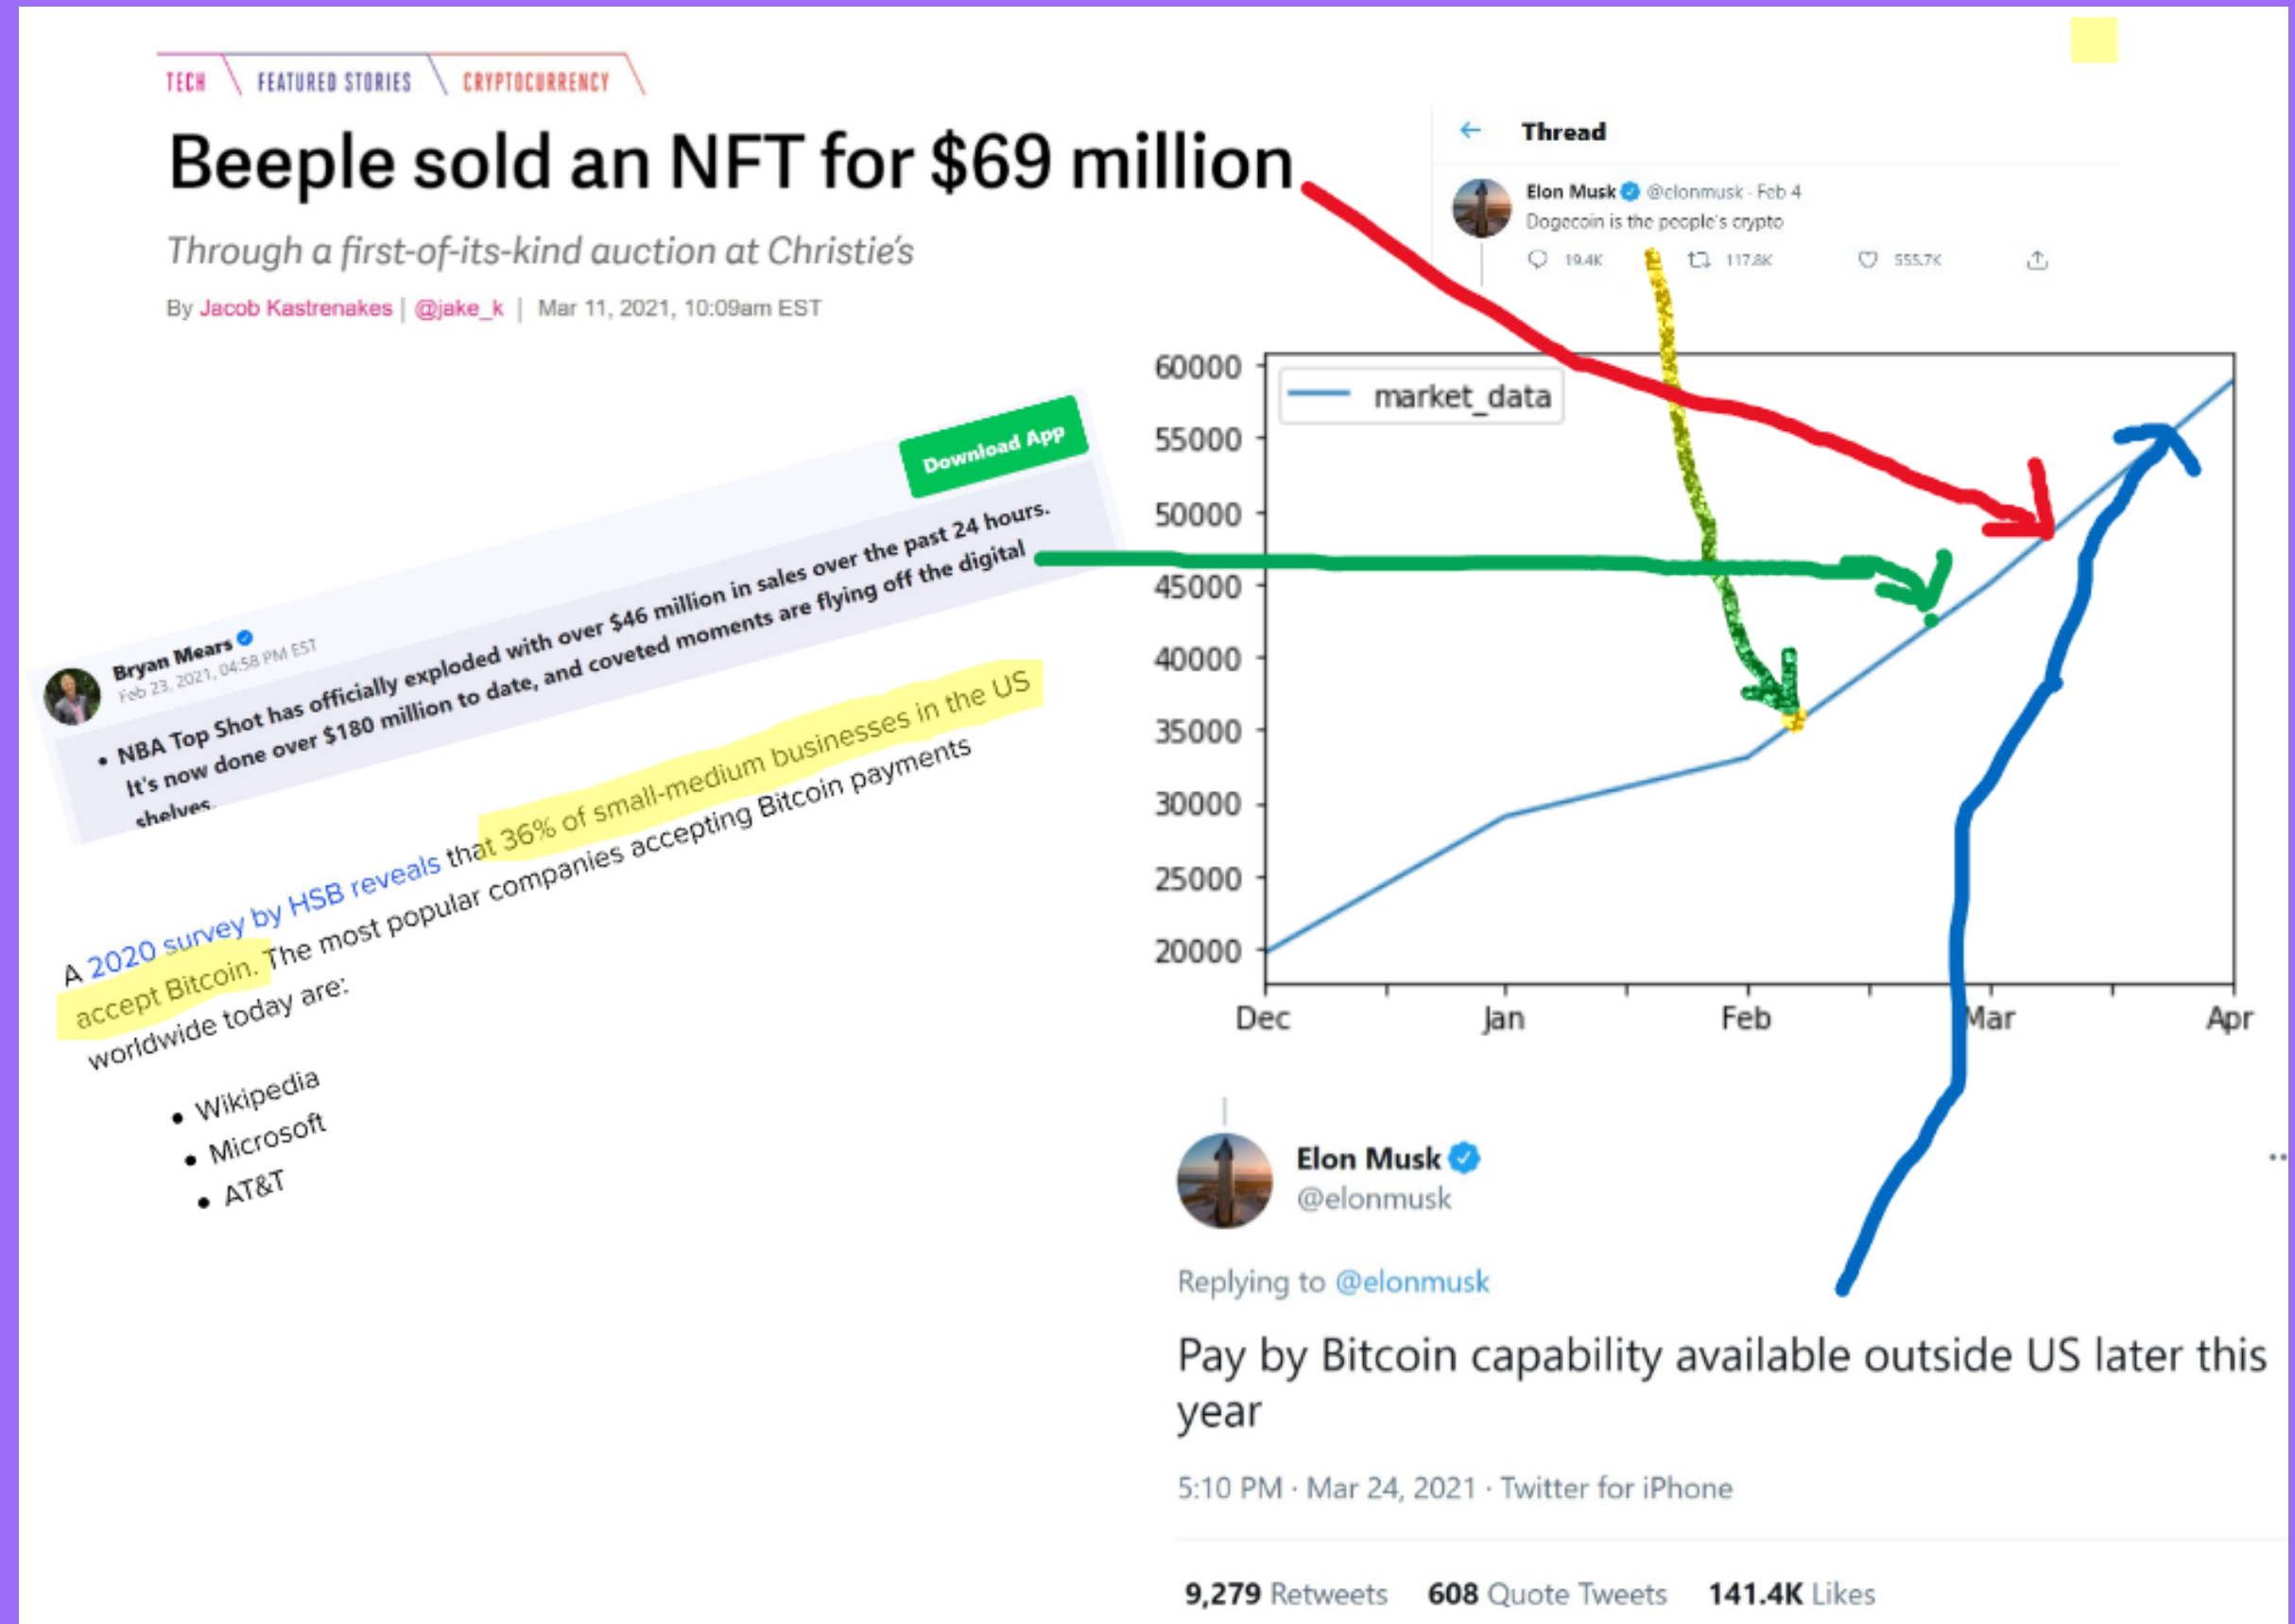

Unique Axie holders

4. Why are gaming NFT's becoming popular?

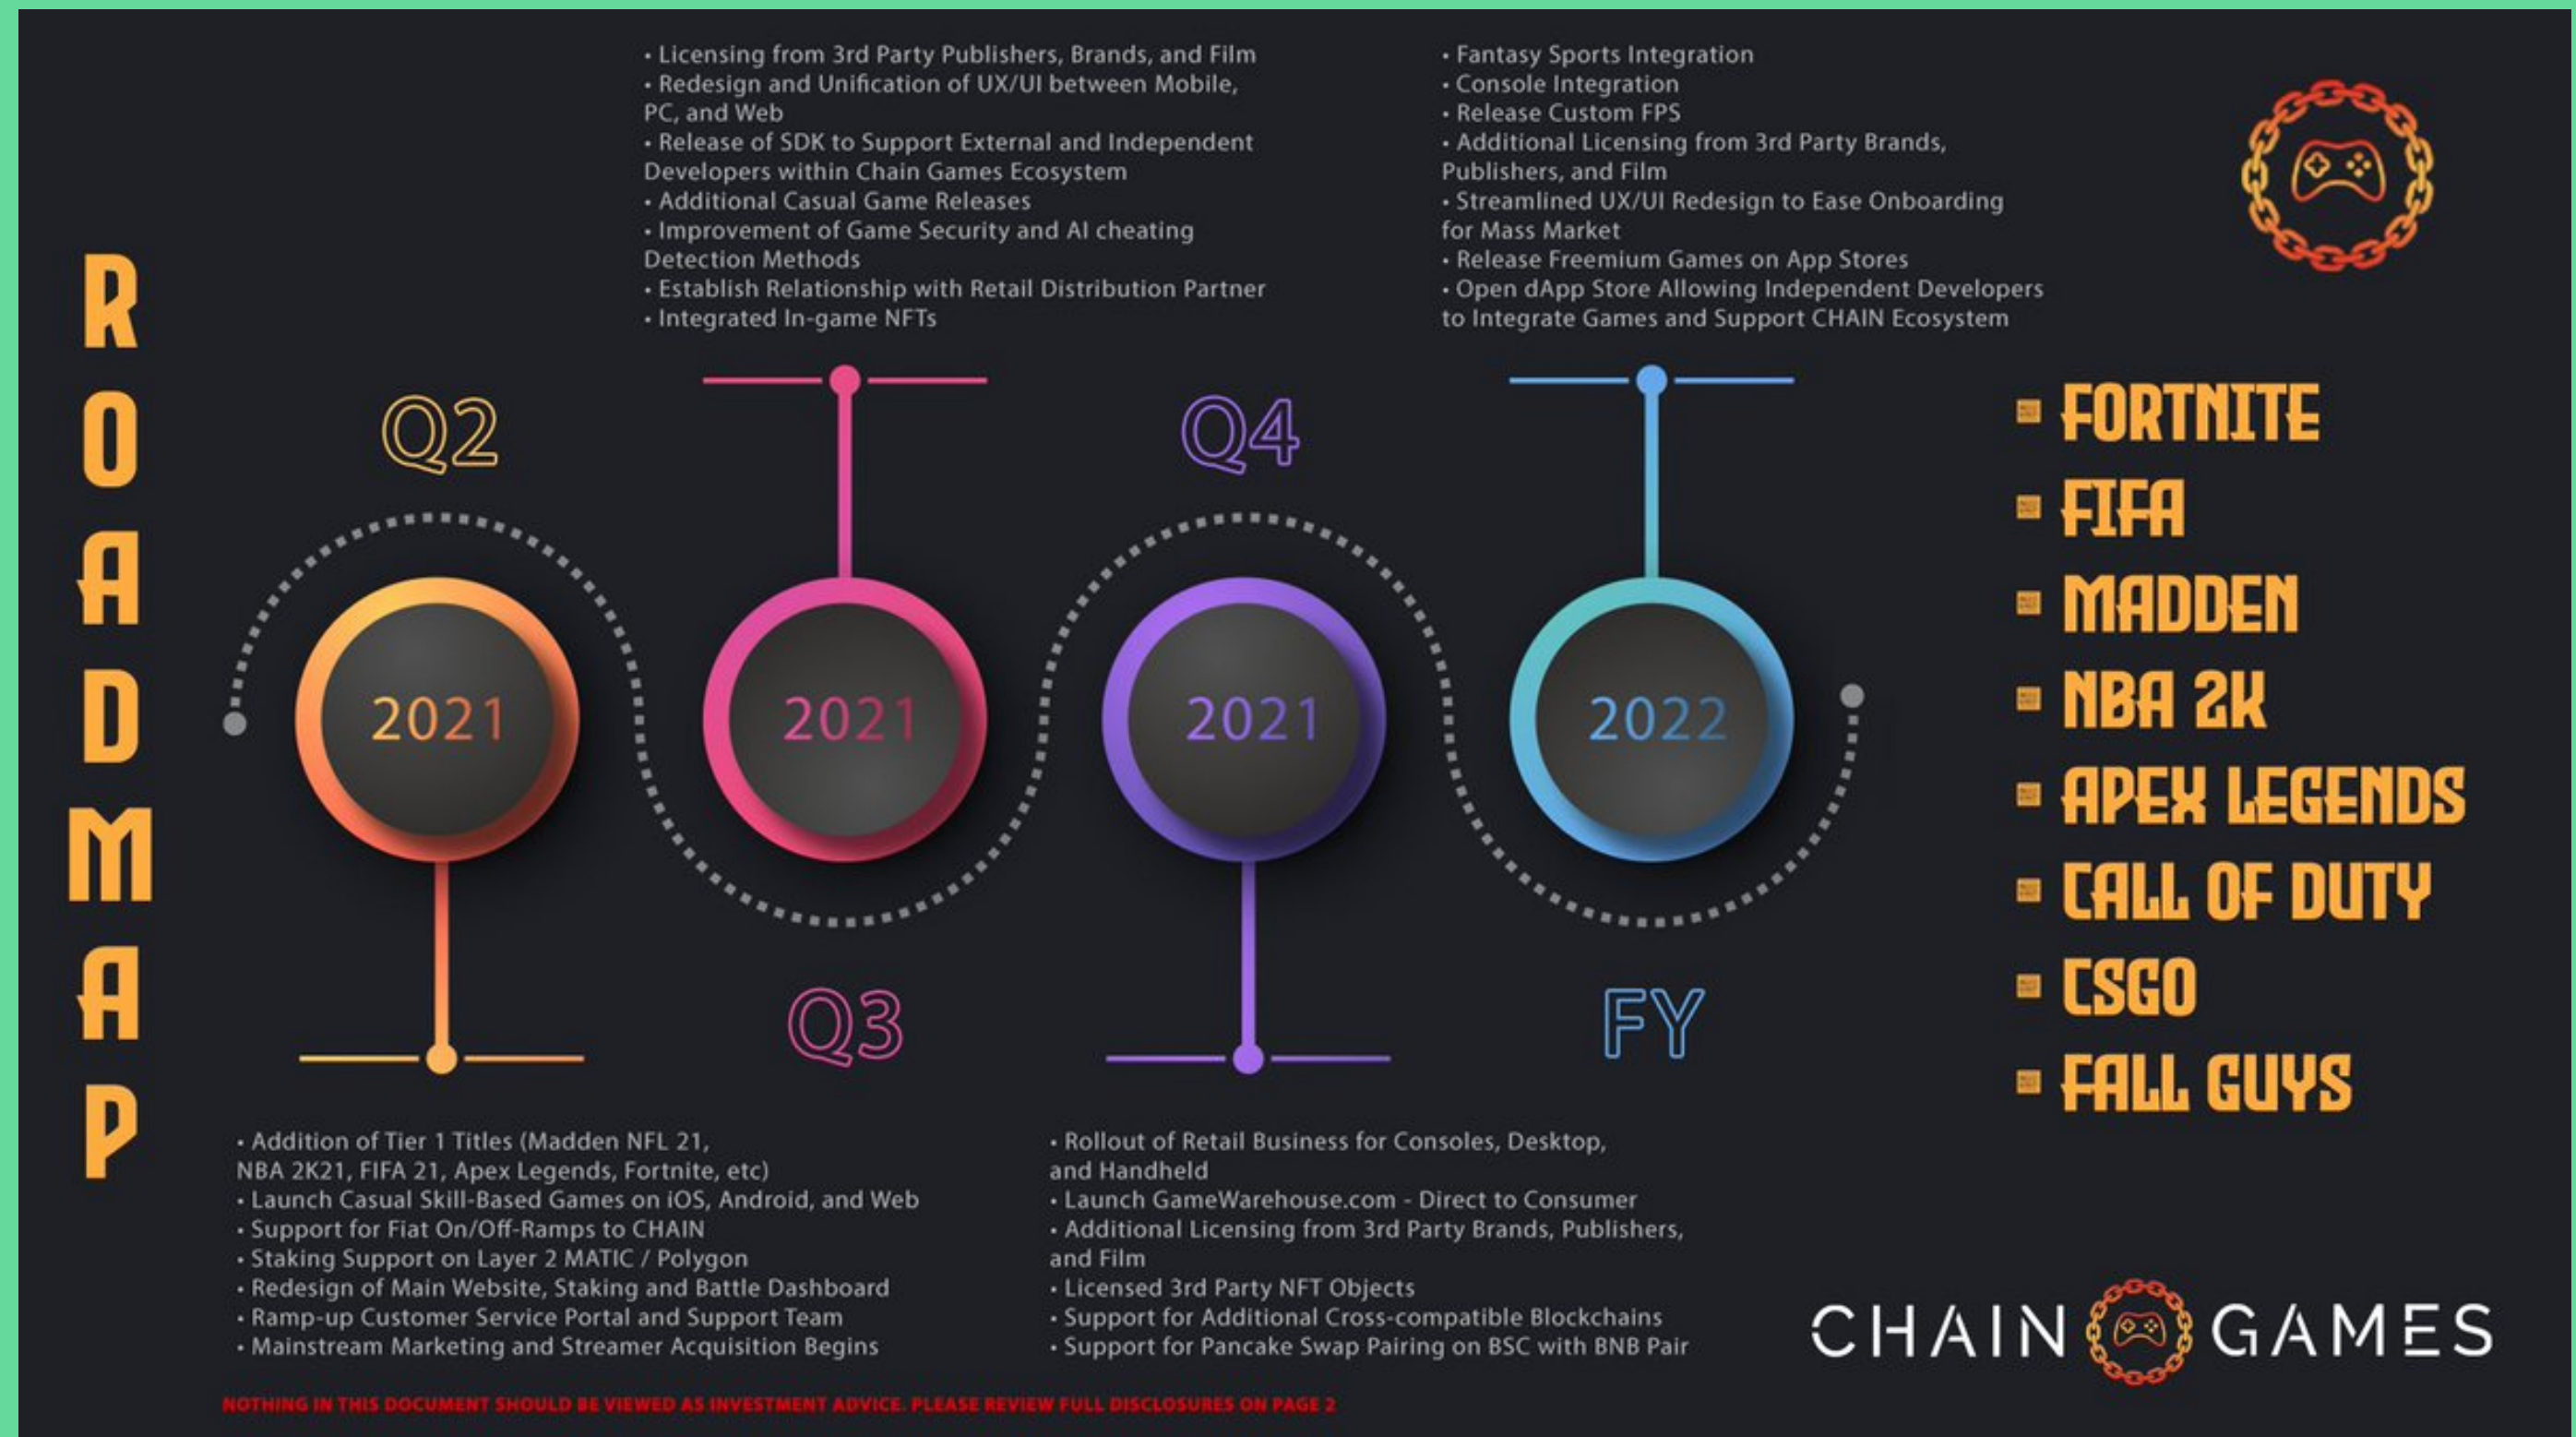

Increase of Bitcoin Prices

- Increase in businesses accepting bitcoin as payment.

4. A look into Chain Games

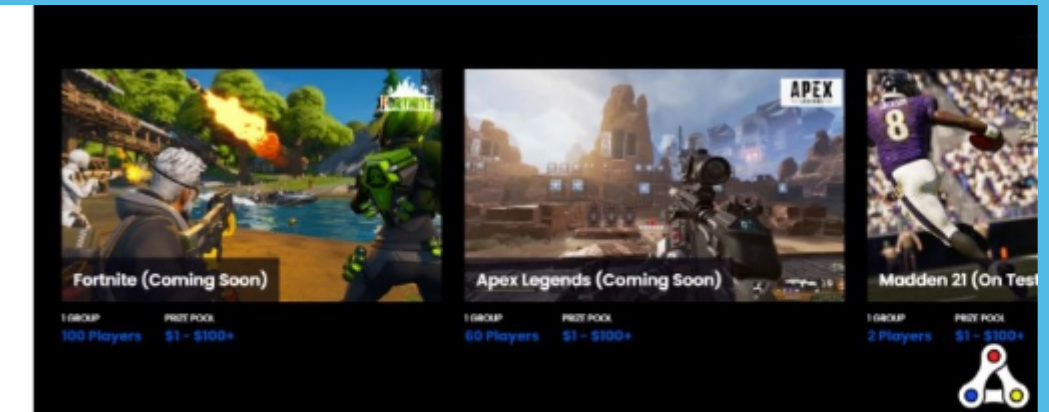

Chaingames Plan

4. Why so pricey?

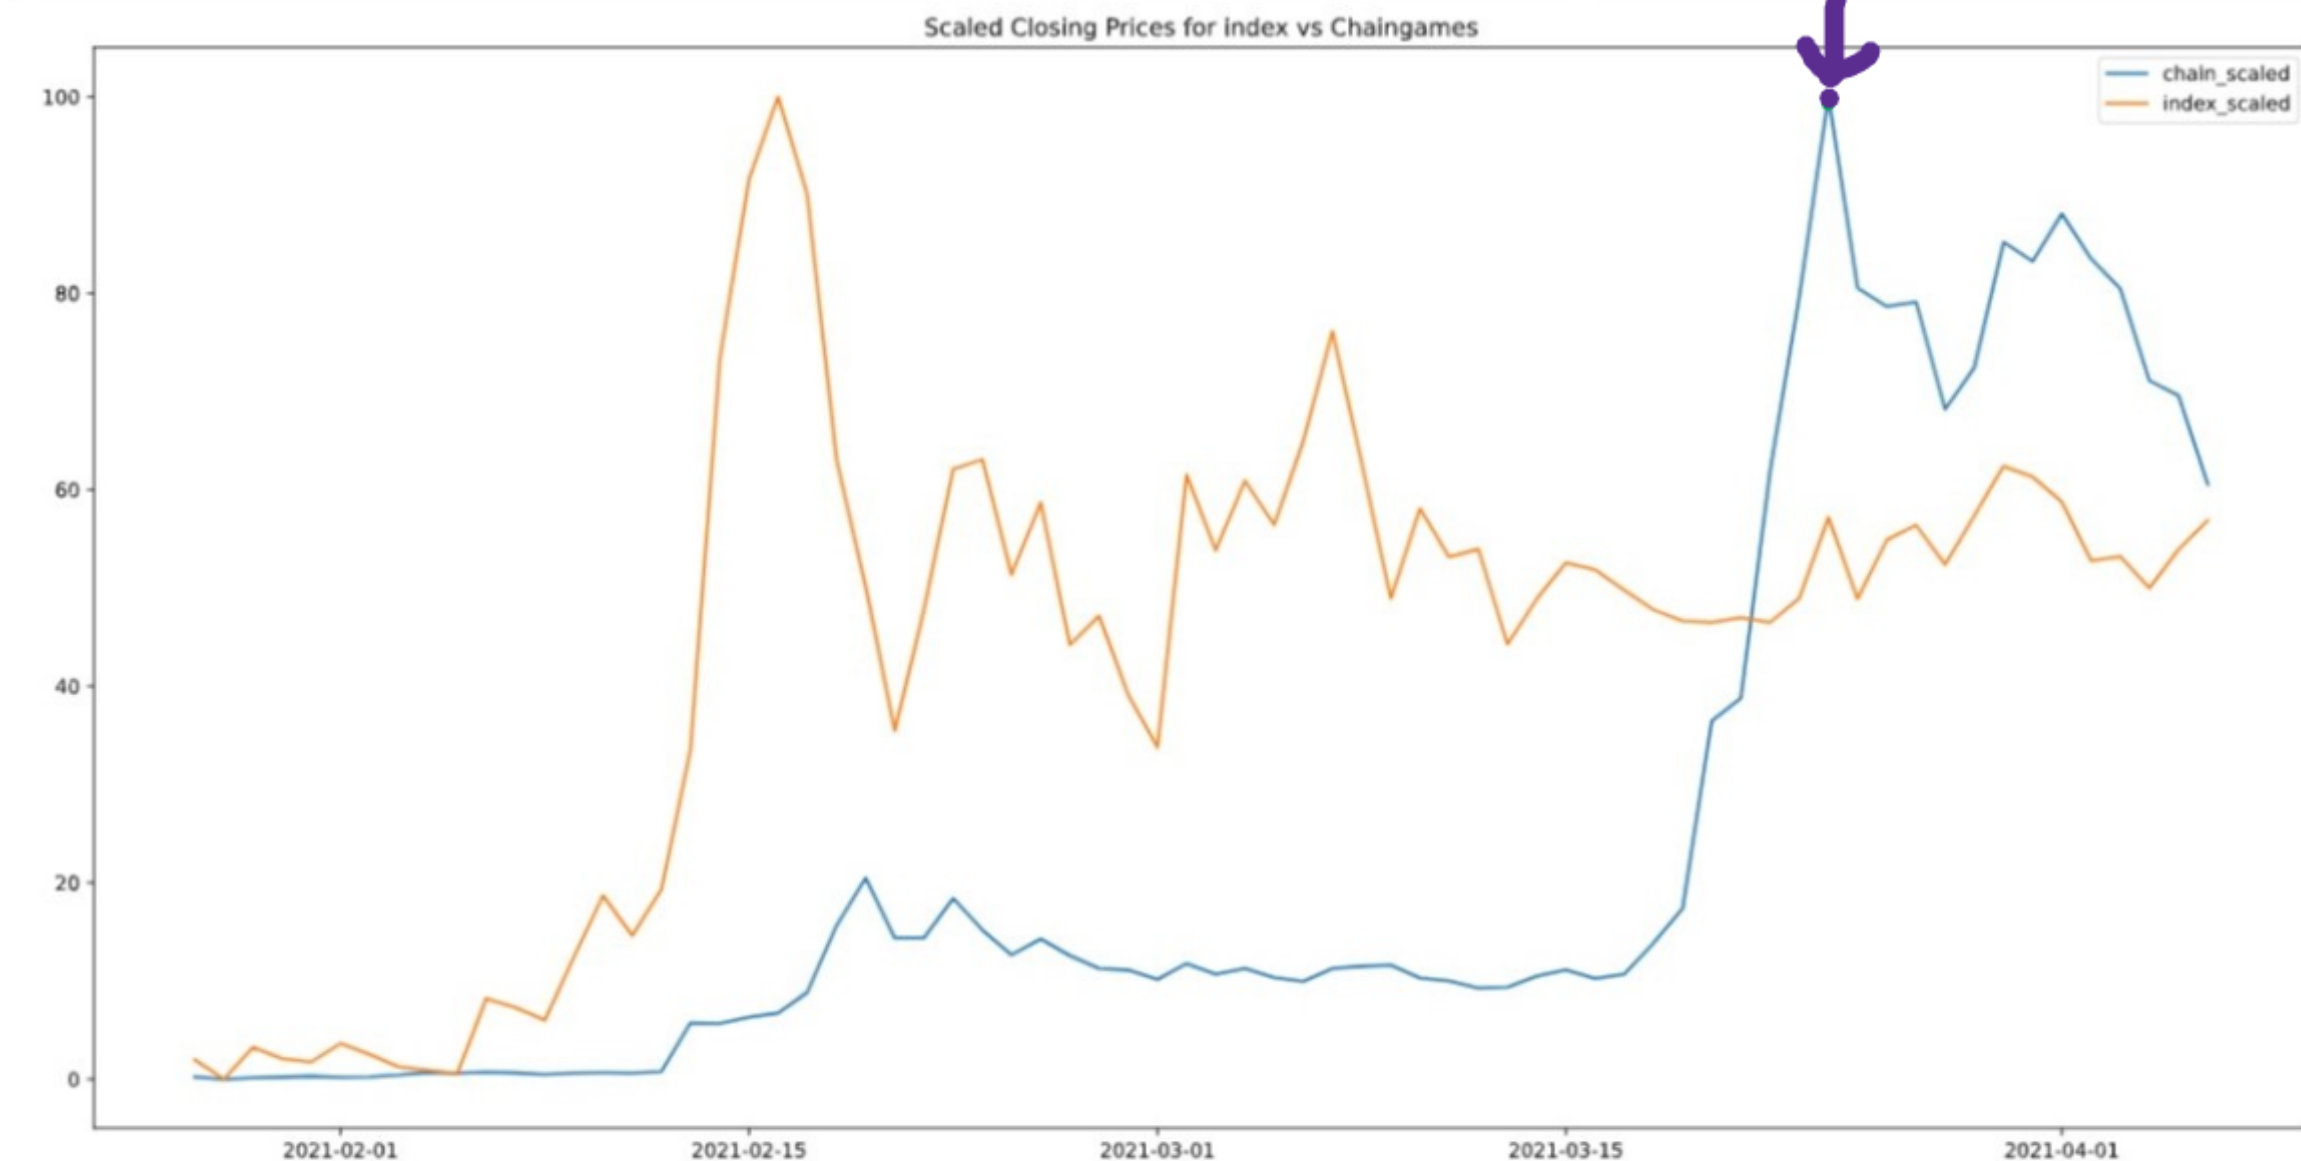

NFT Market Index vs. Chaingames Index

- Chain games adding Fortnite to platform crypto betting capability

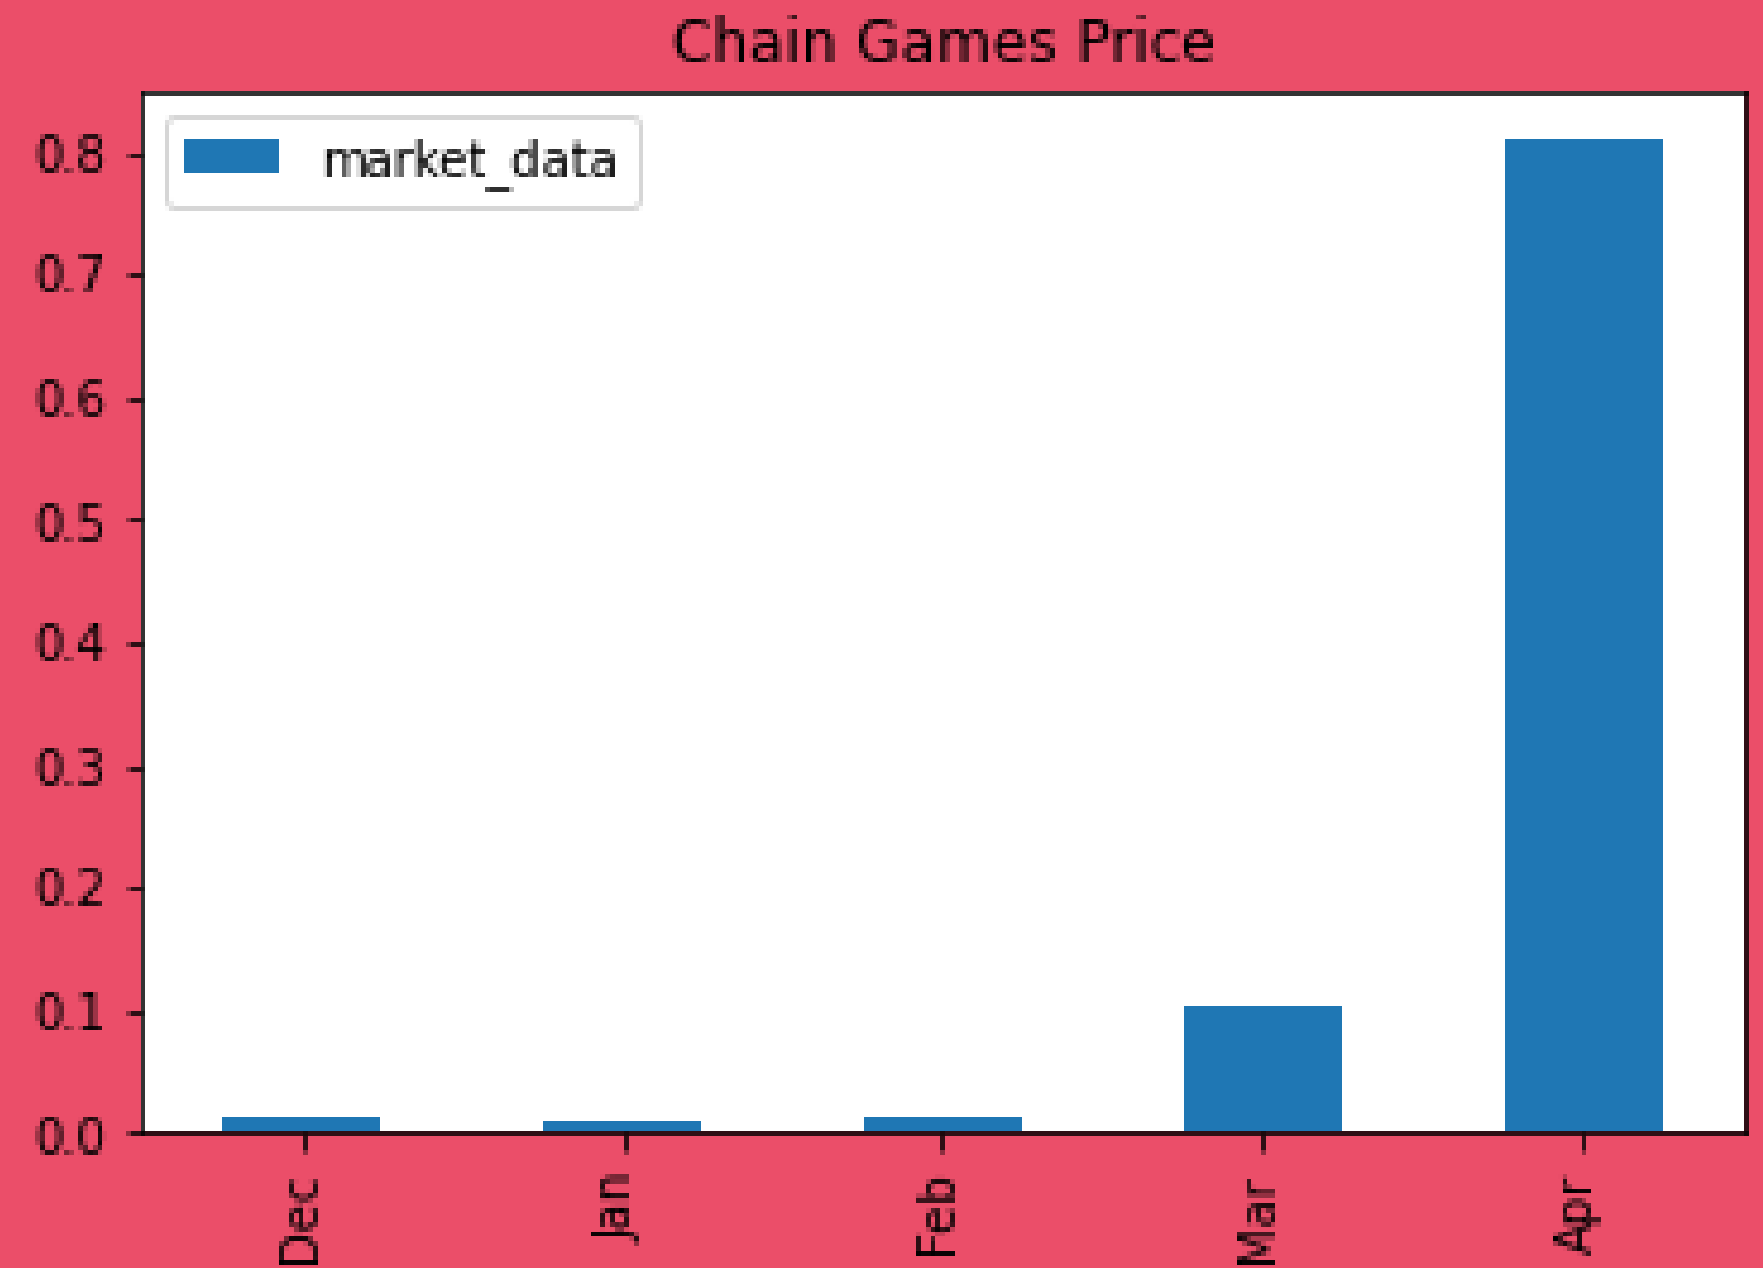

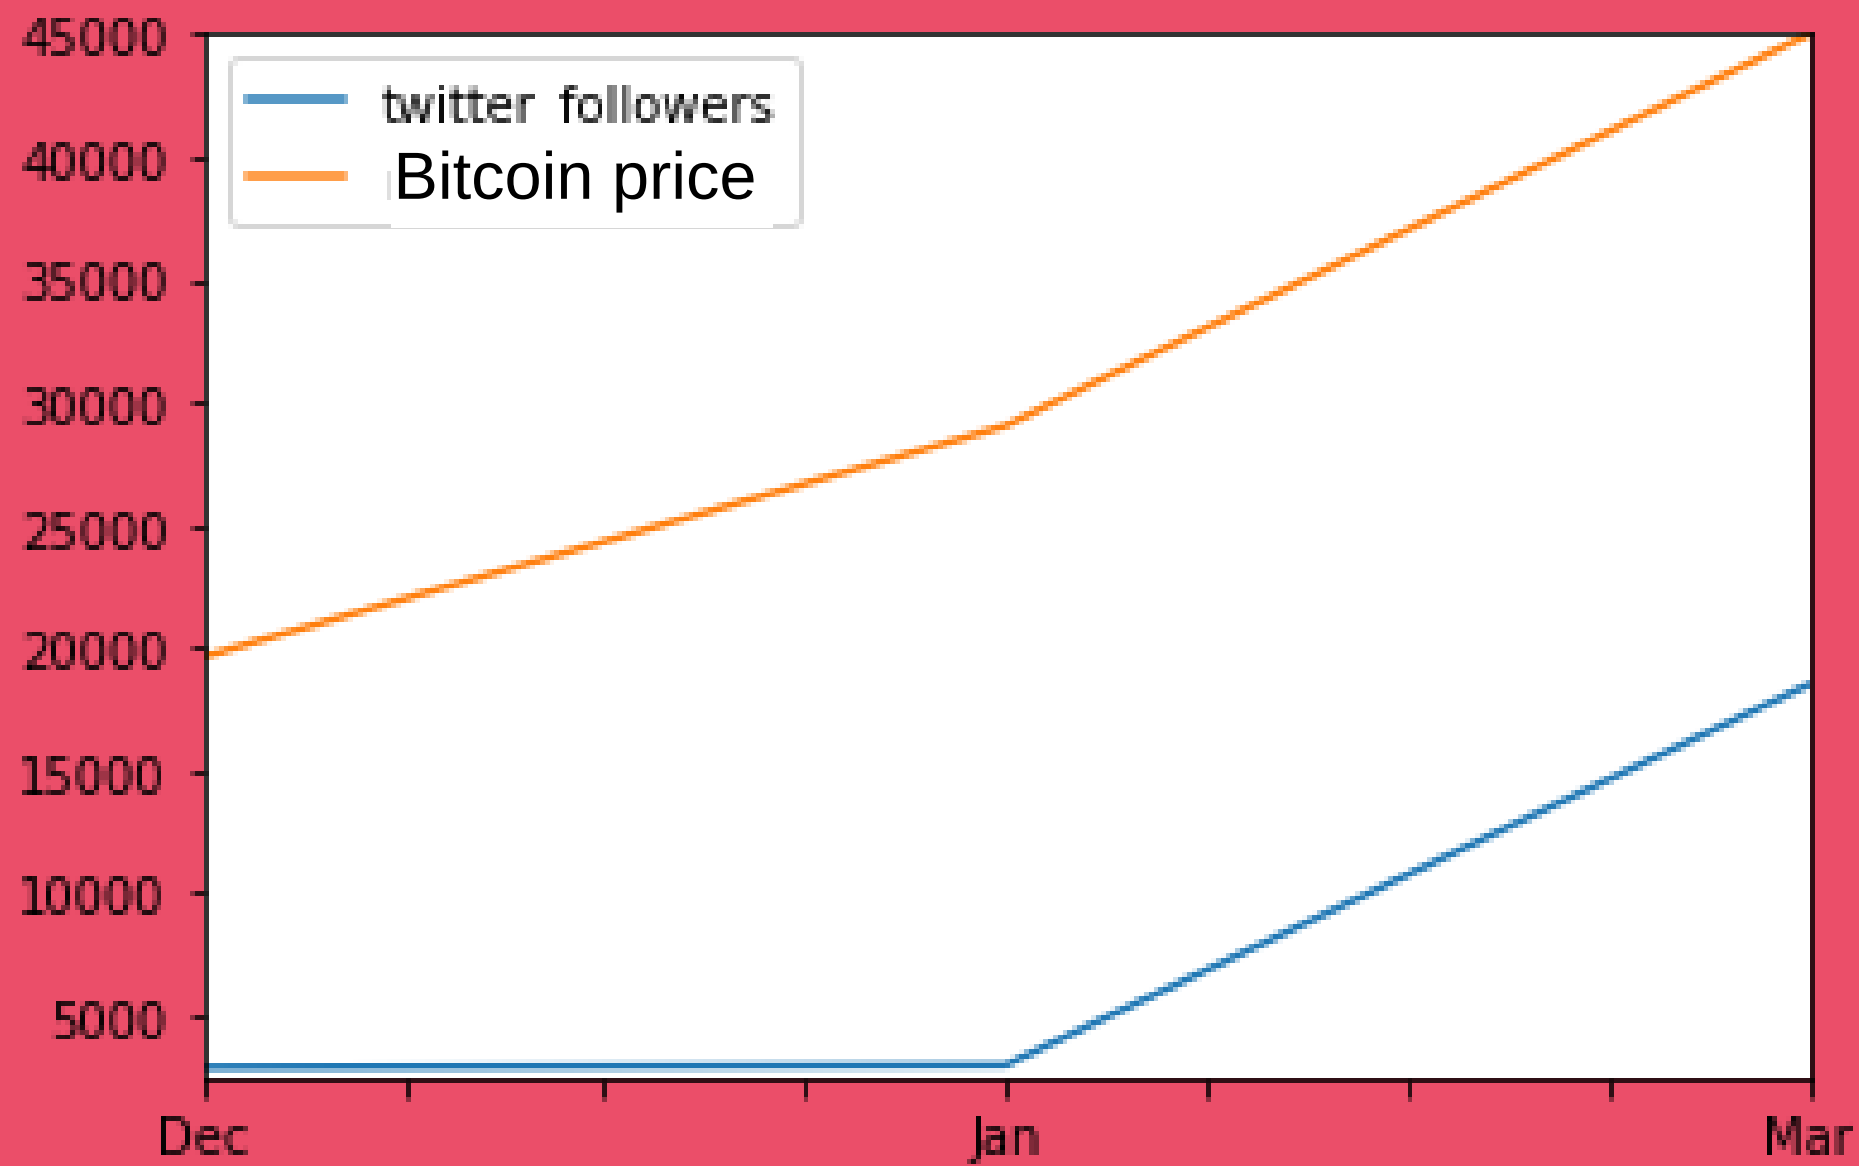

Chain Games Adding Support for Fortnite

4. What the people want

Final findings

Discussion

-Discuss your findings. Did you find what you expected to find? If not, why not? What inferences or general conclusions can you draw from your analysis?

What did we expect to find?

What did we find?

Real talk - Would we invest in this space? How?

The screenshot displays the 'TokenSets' interface on the Set Protocol website. At the top, there is a navigation bar with the Set logo, 'TokenSets' text, a search bar, and links for 'Explore Sets', 'Resources', and 'Sign In'. The main content area features a card for an 'NFT Gaming Set' with the ticker 'NFTRE' and a value of '\$100.00'. Below this, a horizontal bar chart shows the composition of the set: AXS (25.00%), CHAIN (25.00%), SAND (25.00%), and MANA (25.00%). To the right of the card is a large green circular icon with an upward arrow. Below this icon, the heading 'Publish your Set' is followed by a note: 'To publish your Set, you'll need to pay a small amount of ETH to cover the Smart contract creation costs.' A disclaimer states: 'We do not charge fees to create Sets, these costs are Ethereum Network Fees.' At the bottom right, the 'Price to Publish Set via Ether Gas Station' is listed as '\$598.43'.

Token	Percentage
AXS	25.00%
CHAIN	25.00%
SAND	25.00%
MANA	25.00%

Price to Publish Set
via Ether Gas Station: **\$598.43**

Mo data, Mo Problems

- Problem 1:
 - All of the API's didn't have the historical data we required to carry out more intensive data analysis such as:
 - Monte Carlo Simulations
- Problem 2:
 - Using Git to collaborate for version control
- Problem 3:
 - The dependencies and versions in Pyviz
