

NFT HISTORICAL SALES API

Base URL: <https://nonfungible.com/api/v1/>

Our API is available to the public for non-commercial use.

- By using this service or any service on NonFungible.com, you agree to the [Terms of Service](#) and our [Privacy Policy](#).
- You may be banned for 60 minutes if you exceed 30 requests per minute across all API endpoints.
- If you are using the API for research, content creation or anything else publicly available, you must attribute and link back to NonFungible.com as your source of data.
- Please contact us for commercial use requirements.

Market Data

`GET /market/publisher/history/?start=0&length=10`

Description

Returns most recent market sales from a specific publisher.

URI Params

Name	Type	Description
publisher	Required <i>String</i>	Value used as key for the project. Typically, the alpha-numeric, without spaces, lowercase representation. Ex. decentraland, cryptokitties, cryptopunks, knownorigin.
start	<i>Optional</i> <i>Number</i> Default: 0	Retrieve records starting at this position, the first record is “0”.
length	<i>Optional</i> <i>Number</i> Default: 10	Number of records to retrieve after the start record.
search[value]	<i>Optional</i> <i>String</i>	Search sales history for NFT “Asset ID”. See search format below for more information and search options.
columns[0][name]	<i>Optional</i> <i>String</i> Default: "blockTimestamp"	Define the sort column of the results. Currently, only 1 order is supported. Multi-column ordering is not yet supported.
order[0][dir]	<i>Optional</i> <i>String</i> Default: "desc"	Define the sort direction of the order[0][column]. Currently supported: asc, desc
history	<i>Optional</i> <i>Boolean</i> Default: false	If “true”, the sale history for each sale will be attached to the response as “history” (requires “datatype” parameter to be “json”)
datatype	<i>Optional</i> <i>String</i> Default: "json"	Currently supported are: json, csv

Example Query & Response

`GET https://nonfungible.com/api/v1/market/decentraland/history/?start=0&length=1&columns[0][name]=blockTimestamp&order[0][dir]=asc`
